

# WORKSHOP: First Steps Toward Mastering Team-Based Learning

Friday, February 1, 2019  
8:30 am – 3:30 pm

University Union  
University of North Texas, Denton, TX

---

Are you disappointed by student attendance? Do you tell students to read before class, yet find they arrive unprepared? Are you interested in implementing active learning, but are not sure how to devise engaging activities? Team-Based Learning (TBL), an evidence-based teaching strategy designed for active learning, is an effective way to address these problems!

The intended workshop audience is faculty who are interested in learning about and experiencing TBL. The workshop will cover the fundamental principles and practices of TBL, how to create effective TBL Modules, and ways to effectively facilitate discussions.

Dr. Chris Burns, professor and Chair of Biomedical Education at CA Health Sciences University, and highly-qualified, experienced TBL Trainer-Consultant, will lead this interactive workshop.

Lunch will be provided!
